To Re-Innovate, Re-Adapt & Digitally Transform Your Business In the 21st Century

Course Synopsis

In the modern era, our society is primarily empowered by technology and digital technology is rapidly transforming industries around the world, i.e. finance, automotive, hospitality and much more. It is time for Singapore businesses to evolve digitally and to catch up with the global trend.

To embrace digital transformation is no longer an option for businesses; big or small, more so if these firms intend to remain competitive and comply with the ever evolving government regulations and business requirements, especially in winning project tenders.

This course will educate the participants on what is happening around the world with regards to technology evolution, the impact it does to business organisations and what the participants need to do (and the gaps they must cross) to reach their digital vision.
